

Intestinal Worms Weekly Update

Book a time to discuss progress - <https://calendly.com/kkubelick3/15min>

Date: 3/31

Last Week's Achievements:

*Finished midterm report
Instantiated github repository
Obtained images of lab space from
Uganda & discussed with team*

This Week's Targets:

Ensure all members are added to and know how to use github repository
Make spreadsheet of all possible algorithms we can try
Curate and upload our artificial dataset to the github repository

Questions for Discussion During Class (if applicable, otherwise write N/A):

Any updates on how the slides from Ghent process is going would be appreciated! No worries if there isn't an update yet, we're just excited to be getting the samples 😊

Upcoming Milestones:

Curated & uploaded dataset easily accessible to team members through github
